For almost 13 years 2Spring is professionally supplying the life science industries. Serving our customers with a "client first approach", 2SPRING stands for commitment, technical & medical knowledge, reliability and confidentiality, providing real, reliable and solid solutions to our customers.

2Spring represents highly R&D and client orientated companies, each leading in its field. These OEM suppliers together form a synergy of answers to engineers, developers, project and R&D managers in the innovative medical world.

The capabilities of our suppliers include:

Wire drawing, forming, cutting, straightening, coating in a wide range of alloys

Metal tube in a wide range of alloys, fabricated to your need.

Silicone and medical rubber based molded or extruded products, tri-layers; specialty extrusions such as bumped/flared, co- & TRI-layers, OEM balloons or balloon extrusions, a wide variety of secondary operations such as tipping, hole punching, assemblies, etc..

Balloon blowing, curing, pleating & folding machines and molds and tooling.

Machinery for catheter production (tipping, necking, bonding, flaring, bullet tips, angle and radius tips)

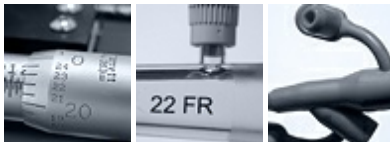

OEM LC/EP coronary, peripheral, neuro tubular stent & filter products in a wide variety of exotic metal alloys or thermo plastics blends.

Specialty metal products in a full range of tempers and over 70 different alloys (including Nitinol) on stock.

Measurement equipment like Lasergauges & Ultrasonics systems.

Besides our product line we also specialize in training & support on equipment that we offer.

For more detailed information please take a look at the "products" banner in the main menu. The 2Spring-team is happy to help you with technical queries you may have. Go to "who is 2Spring" to find out who's your account manager. □
